ORYX WORKSHOES

PROGRESSION

NEW!

ORYX SERIES

PROGRESSION. A SIGNIFICANT STEP IN SUSTAINABILITY.

We have long been working on a line of products where our benchmark quality and functionality meet, and surpass, the sustainability standards that are increasingly in demand on the market in general and the European market in particular.

The outcome is PROGRESSION, a wide series of garments that comply to the essential certificates and standards but also goes well beyond that in terms of sustainable features. We communicate a dozen of those features.

Please read more about PROGRESSION on page 94.

ORYX WORKSHOES. BECAUSE YOU ALWAYS BUILD FROM THE BOTTOM.

There are many workshoes on the market but there is only one from PROJOB.

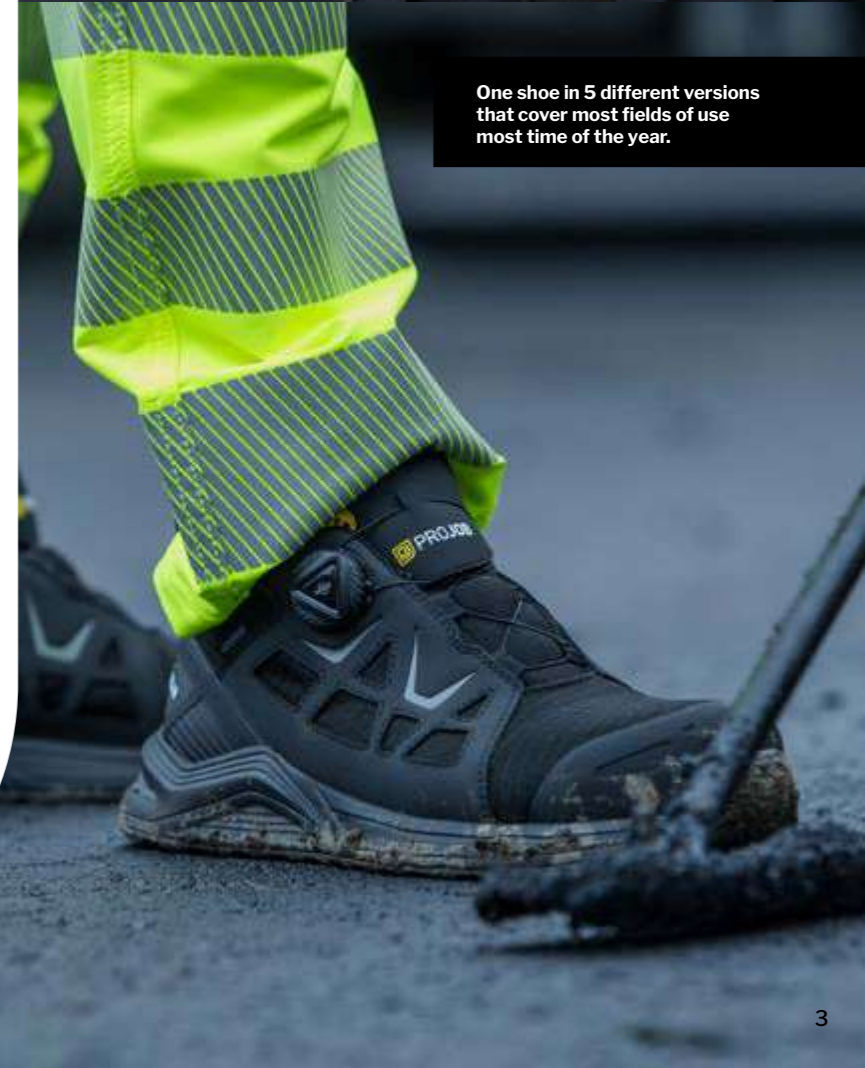

The Oryx is one shoe in different versions but the qualities and comfort are universal.

We have used our core philosophy and a lot of internal and external know-how and experience to make a shoe that completes our market offer from 2025.

Please read more about Oryx Workshoes on page 158.

The distinct broken reflective pattern is a distinct and unique visible feature.

One shoe in 5 different versions that cover most fields of use most time of the year.

WHEN DUTY CALLS

RIISING TO THE CHALLENGE: GREAT WEAR FOR MEN AND WOMEN WORKING OUT THERE.

We could talk for days about functionality and quality and ergonomics, the key values in our product development. But another, more tangible thing that we focus on is providing great clothes that fit both men and women of all sizes, making those values accessible to all workers when duty calls.

MORE PROJOB HIGHLIGHTS

PREVENT WEARING & TEARING

RIP-STOP [PAGE 40 AND 58]

We have added 2 more rip-stop jackets to our collection. Rip-stop is a well-proven weaving technique that creates a mesh of stronger threads that both distributes the strain over the surface and contains small rips from spreading further. A very good feature if you work in an environment with high risk of cuts and scratches.

COLD WEATHER COMFORT

6425 LINED JACKET [PAGE 63]

If you work in High Visibility garments you most likely work a lot outdoor. Everyone who works all year outdoor should have a fleece reinforced jacket as part of their work outfit.

Our model 6425 is thoroughly lined with fleece pile from the hood down to the seat, which is extended to provide more cover.

The multi-layer principle can take you far, but sometimes a really warm jacket is unbeatable.

A HIGHLY VISIBLE MIDDLE CLASS FAMILY

6108 / 6109 / 6110 [PAGE 67]

There are many nice garments in the middle-layer segment that we want to pinpoint.

A very good example is the group of siblings shown here: A functional sweatshirt, a fullzip (which is also available in Ladies' cut) and a fullzip hoodie. Ideal for working indoor or in fair weather. The fabric is soft, durable and dirt repellent. After all, you are supposed to work in these garments.

DURABLE VALUE

3417 PADDED JACKET FROM PRIO SERIES [PAGE 121]

From our PRIO series we would like to highlight a real hidden gem, the 3417 padded softshell jacket. It has a plain and robust design that works in most areas and a high resistance to dirt but what makes it stand out are the reinforced shoulders and elbows that makes the jacket more durable but also makes it look a lot cooler.

The PRIO series is our collection of garments where we can offer PROJOB quality in a lower cost range due to large purchases and simplifications in design. Really high quality nonetheless. If you have not explored PRIO yet, we strongly recommend you to do so.

CONSTRUCTION

PANTS • SHORTS • PIRATE PANTS

Construction is Heavy Duty work and that is what we make the pants for. Focus is on functional details such as pockets, reinforcements, materials and a design for enhanced durability. Still comfort has to be part of the equation and the challenge of mixing ergonomics and durability is something we take very seriously and meet successfully.

Our construction pants don't just look good, they are good on an almost molecular level. We use threads of the highest quality and fabrics like Kevlar® to ensure that they withstand the daily wear and tear. We also like to stress that our unique kneepads are appreciated for being well integrated into the garments, following every movement smoothly.

TRANSPORT, SERVICE & INSTALLATION

PANTS • SHORTS • PIRATE PANTS

If durability and pockets are the key words in defining construction pants, then flexibility and functionality are the corresponding words for this wide category. Because it is quite wide, ranging from what is close to construction in design, detail and reinforcements to very smooth and tight clothes, all in stretch, with a minimum of pockets or details that can get stuck in cars and forklifts or scratch the surface of the materials you are handling.

Whatever you are looking for when it comes to service pants, you are likely to find something in this section. And please note that the Women's versions are in a separate chapter but easy to trace through cross-references at the corresponding garment.

2552 **SERVICE PANTS STRETCH**

Service pants in full stretch that provides maximum freedom of movement and comfort. Modern fit. Leg pockets on both sides with zip closure, phone pockets on both sides with Velcro closure. Folding rule pocket on the right side. Internal back pockets. Pre-bent knees. Internal pockets for knee protectors, adjustable in two height levels. PAINTER

JACKETS • SWEATERS • PANTS

Painters are distinguished by white garments, simply because the prevailing color they work with is white and the stains will not show. White also facilitates the use of stronger washing chemicals without visibly bleaching or discolouring the garment's colour. The dense fabric also blocks colour and putty from bleeding through.

Like in all other categories, we add stretch where needed to provide functional and good looking workwear.

The painter's collective has shown a great liking for our small but adequate and growing range of special garments. We appreciate that and we always have them in mind in our ongoing development.

Quality: 100% cotton - 210 g/m²
Colors: navy-58, stone-83, black-99

HIGH VISIBILITY EN ISO 20471

Guide EN ISO 20471

Reflective clothing is personal protective equipment. Personal protective equipment are products that are designed to be used by a person for protection against health and safety risks.

The special demands placed on personal protective equipment in Europe are described in EN-norms. Products that pass these basic safety requirements are allowed to carry the obligatory CE-mark. In order for a safety product to be approved and marked with the CE mark, it must have been tested and certified by an authorized organisation.

HIGH-VIS CLOTHES FOR PRO USERS

These have to be CE-marked and approved according to the norm EN ISO 20471 (earlier EN 471). The norm describes among other things what colours are permitted, where on the clothes the reflecting material is to be placed, and which information that must accompany the clothes. The design of the clothes must also follow certain criteria in order to achieve the best possible visibility. In the norm there are three classes. The norm specifies how much fluorescing cloth and how big the reflective area reflective clothes of each class must have.

Minimum area with high visible material, m2

	Class 1	Class 2	Class 3
Background material	0,14	0,50	0,80
Reflective material	0,10	0,13	0,20

Class 1

This gives the lowest level of protection. The total fluorescent area must be at least 0.14m² and the reflective area 0.10m². May only be used if there is little contact with a few vehicles and/or slow moving traffic.

Class 2

Gives a much better protection than class 1, especially in daytime, twilight and fog. The total fluorescent area must be at least 0.50m² and the reflective area 0.13m². Class 2 is used in harbours, on railways, building sites, parking places, cross country searches, load bearing vehicles and other places where class 3 is not required.

Class 3

This gives the highest level of protection. The total fluorescent area must be at least 0.80m² and the reflective area 0.20m². To be used in the proximity of fast moving traffic.

HIGH VISIBILITY EN ISO 20471

**JACKETS • SWEATERS • T-SHIRTS & PIQUES
PANTS • SHORTS • PIRATE PANTS • COVERALL • VESTS**

Every workwear brand is measured by their High Visibility range. The use of these garments has become very widespread in all fields of work and they pretty much symbolize manual outdoor work. PROJOB has a very wide range from Class 1 to Class 3 and this chapter covers most EN ISO 20471 garments

except feminine versions which you find under the Women's Workwear section with references and the new PROGRESSION items that you find exclusively in that section.

Back pockets in Cordura®, one with flap and magnetic closure. Pre-bent knees. Internal pockets for knee protectors, adjustable in two height levels. Holster pockets and knees are reinforced with Cordura® for increased durability. Possibility to attach MOLLE-system on both sides.

Size: C44-C62, D84-C120
Quality: 1: 92% polyester, 8% spandex - 250 g/m²
 Material 2: 80% polyester, 20% cotton
 Material 3: 100% polyamide
 Reinforcements: 100% polyamide, Cordura®
Colors: yellow/navy-10, yellow/black-11, orange/black-1799
Certification: EN ISO 20471 Class 1 C44-C50, D84-D96 Class 2 C52-C62, D100-D120

6580

SHORTS EN ISO 20471 CLASS 1

Shorts in stretch for maximum freedom of movement. Modern fit. 4-way stretch over thighs and back. The sides at the top are not in stretch to give stability to the shorts. Holster pockets with extra compartments and internal Cordura® reinforcement, by unpicking the contrast seam on the backside holster pockets can be removed if wanted. Spacious leg pockets on both sides. Left leg pocket for tools and pens, also one phone pocket with magnetic lock and bracket for fastening ID-card. On the right side pocket for folding rule and pocket for tools with knife button. Possibility to add complementary gear by Velcro. Holster pockets are reinforced in Cordura® for increased durability. Reflectors from 3M.

Size: C44-C62
Quality: 1: 92% nylon, 8% spandex - 250 gsm
 Material 2: 100% cordura
 Material 3: 100% polyester
 Material 4: 80% polyester, 20% cotton
Colors: yellow/navy-10, yellow/black-11
Certification: EN ISO 20471 Class 1

10 11

6450

RAIN JACKET EN ISO 20471 CLASS 3/2

Functional layer-3 jacket, in wind- and waterproof material with taped seams. Ventair material, which means that the jacket has excellent breathability and is comfortable to wear. Waterproof zipper up to the collar at front, with internal windflap and chin guard to prevent chafing. Breast pocket on the right side with internal bracket for ID-card. Extended back. Adjustable hood in two ways with drawstring. Adjustable cuffs with Velcro and adjustable waist with drawstring.

- Size:** XS-4XL
- Quality:** 100% polyester - 160 g/m²
- Colors:** yellow/black-11, orange/black-1799
- Certification:** EN ISO 20471 Class 2 XS-S, Class 3 M-4XL, EN 343 3/3/X

1799 11

powered by **CRAFT** | **VENTAIR**

6403

RAIN JACKET EN ISO 20471 CLASS 3

Long rain jacket, length 100 cm. Wind- and waterproof with sewn and welded seams. Closure at front with press-studs. Adjustable cuffs with press-studs and adjustable hood with drawstring.

- Size:** XS-4XL
- Quality:** Polyurethane-coated polyamide tricot 170 g/m²
- Colors:** yellow/navy-10, yellow/black-11, orange/navy-17
- Certification:** EN ISO 20471 Class 3, EN 343 3/1

17 10 11

6550

RAIN PANT EN ISO 20471 CLASS 2/1

Wind- and waterproof pants with great breathability. Taped seams. The VentAir material in three layers keeps the body dry all day. Elastic waist with drawstring. Spacious side pockets on both sides with zip closure, covered with flap to avoid leakage of water. Zippers along legs to facilitate dressing and undressing, covered with flap (35 cm in size L). Adjustable leg ends with Velcro.

- Size:** XS-4XL
- Quality:** 100% polyester - 160 g/m²
- Colors:** yellow/black-11, orange/black-1799
- Certification:** EN ISO 20471 Class 1 XS-M, Class 2 L-4XL, EN 343 3/3/X

6431

RAIN JACKET SHORT EN ISO 20471 CLASS 3/2

Rain jacket with sewn and welded seams to be waterproof. Zipper at front covered with flap to prevent wind draft as well as water leakage, press-stud closure. Side pockets on both sides with flap, fleece lined for extra warmth and comfort. Detachable hood, adjustable in two ways with drawstrings. Adjustable cuffs with press-studs.

- Size:** XS-4XL
- Quality:** 1: 100% pu
Material 2: 100% polyester - 170 g/m²
- Colors:** yellow/black-11, orange/black-1799
- Certification:** EN ISO 20471 Class 2 XS-S, Class 3 M-4XL, EN 343 3/1

1799 11

6466

ALLROUND JACKET EN ISO 20471 CLASS 3

Wind and waterproof jacket with taped seams. Excellent breathability. Ventilation channel at the top of the back. Chest pocket with water-resistant zipper and internal phone pocket, as well as an opening for a headset. Side pockets with zipper. Inner pockets with zipper, one slightly larger with a phone pocket. Collar with detachable, stowable hood. Adjustable cuffs with elastic and Velcro, also adjustable at the waist. Extended back. Lining can be opened to facilitate printing.

- Size:** XS-3XL
- Quality:** 1: 100% polyester
Lining: 100% polyester - 200 g/m²
- Colors:** orange-17
- Certification:** EN ISO 20471 Class 3, EN 343 3/3

SHELLCLOTHES EN 343

JACKETS • PANTS • UNDERWEAR

GUIDE EN 343

Clothing that carries an EN 343 certification is tested for protection against bad weather.

The latest version of EN 343:2019 involves testing seams for water penetration in classes 1-4 and resistance to water vapor classes 1-4, with 4 being the highest class. The garments must achieve results on both tests to be labeled with the EN 343 symbol.

- Protection against ingress of water: 1-4, where class 4 gives the best waterproofness
- Water vapor resistance (breathability): 1-4, where class 4 provides the best breathability
- Effect of high pressure water drops from above (this is optional)

The results are affected by the construction of the garment, where an unlined garment can achieve EN 343 4/4 while a lined garment with the same outer fabric (but with a lining that affects the penetration of moisture) only achieves EN 343 4/1.

The previous standard only had 3 classes, these have now been expanded with a fourth class that requires a higher result. Garments certified according to EN 343 continue to apply. PROJOB Workwear will continuously update certified garments.

Water resistance (WP)

Class 1 ≥ 8000 Pa

Class 2 ≥ 8000 Pa material after pretreatment

Class 3 $\geq 13,000$ Pa material after pretreatment

Class 4 $\geq 20,000$ Pa material after pretreatment

Water vapor resistance (Ret)

The breathing function is indicated in RET value. At a lower RET value, the better respiratory function.

Class 1 Ret > 40

Class 2 $25 < \text{Ret} \leq 40$

Class 3 $15 < \text{Ret} \leq 25$

Class 4 Ret ≤ 15

We regularly overhaul the presentation structure of our product categories to highlight certain features or functions. To single out Shellclothes with EN 343 classification is such a measure.

In the following pages we emphasize all garment with an EN 343 level of rain and moisture resistance. Those are very well designed items that deserve to be raised from the crowd of garments.

UNDERWEAR INSIDE AND OUT

Underwear in three different qualities, one for every situation.

Yellow themed underwear is for everyday wear.

Orange are advanced underwear with body mapped climate zones for excellent body temperature, during maximum performance.

Red is for our warmest quality made of merino wool, that keeps you warm under the toughest cold.

Neither of our underwears has got side seams to prevent chafing and irritation!

3108

UNDERSHIRT

Undershirt with round neck made of mulesingfree merino wool that keeps the body warm and dry in cold weather conditions. Soft and stretchy material for unrestricted freedom of movement. Extended back. Cuffs at sleeve ends.

Size: XS-4XL
Quality: 1: 100% merino wool
 Material 2: 94% polyester, 6% polyamide - 200 g/m²
Colors: black-99

3508

LONG JOHNS

Long johns in mulesing free merino wool that keeps the body warm and dry in cold weather conditions. Soft and stretchy material for unrestricted freedom of movement.

Size: XS-4XL
Quality: 1: 100% merino wool
 Material 2: 94% polyester, 6% polyamide - 200 g/m²
Colors: black-99

3101

UNDERSHIRT

Functional undershirt with round neck. Fits snugly to body. Raglan sleeves for greater freedom of movement. Extended back. No side seam, preventing chafing and irritation. Knitted cuff at sleeve end. Two-tone with flatlock seams in contrast color.

Size: XS-3XL
Quality: 100% polyester - 135 g/m²
Colors: black-99

powered by
CRAFT

PRO DRY™

3103

UNDERSHIRT POLO

Functional undershirt with polo, short zipper at front with zipguard to protect chin from chafing. Fits snugly to body. Raglan sleeves for greater freedom of movement. Extended back. No side seam, preventing chafing and irritation. Knitted cuff at sleeve end. Two-tone with flatlock seams in contrast color.

Size: XS-3XL
Quality: 100% polyester - 135 g/m²
Colors: black-99

powered by
CRAFT

PRO DRY™

3501

LONG JOHNS

Functional long johns with a fit that follows body movements. Fits snugly to body for optimal ventilation. Elastic waist. Knitted leg ends.

Size: XS-3XL
Quality: 100% polyester - 135 g/m²
Colors: black-99

powered by
CRAFT

PRO DRY™

3106

UNDERSHIRT, WOOL

Functional undershirt with round neck made of mulesingfree merino wool. Fits snugly to the body. Raglan sleeves for greater freedom of movement. Extended back. No side seam, preventing chafing and irritation. Knitted cuffs at sleeve ends with thumb grip.

Size: XS-4XL
Quality: 80% wool, 20% polyamide - 220 g/m²
Colors: black-99

3505

LONG JOHNS ADVANCED

Functional long johns in a cool design. Close to body-fit and elastic for optimal movement and comfort. Bodymapped climate zones that guarantees excellent body temperature for maximum performance.

Size: XS-3XL
Quality: 52% polyamide, 42% polyester, 6% elasthan - 220 g/m²
Colors: black-99

3530

BOXER SHORTS FUNCTION, 2 PACK

Boxer shorts in functional material. Classic, tight fit.

Size: XS-4XL
Quality: 92% recycled polyester, 8% spandex - 160 g/m²
Colors: black-99

3531

BOXER SHORTS, 2 PACK

Boxer shorts in classic, tight fit.

Size: XS-4XL
Quality: 95% cotton, 5% spandex - 160 g/m²
Colors: black-99

3532

HIPSTERS WOMEN'S, 2 PACK

Hipsters in classic, tight fit.

Size: XS-XXL
Quality: 95% cotton, 5% spandex - 160 g/m²
Colors: black-99

PROGRESSION

**JACKETS & VESTS • SWEATERS • T-SHIRTS & PIQUES
PANTS • SHORTS • COVERALLS**

PROGRESSION is our response to just about every requirement that the market has on sustainable yet functional workwear for a foreseeable time. We have really gone into detail and made no compromises in our strive to be in the forefront. We hope this is obvious to you as we take the concept to market this year.

Certifications and standards come first in the dozen of values that we decided to focus on in our communication.

We will in the following pages describe in short what each icon stands for and how it affects the environment and/or the garment functionality in a positive way.

1. EN 17353

Certification for enhanced visibility equipment for medium risk situations. This standard specifies requirements for enhanced visibility equipment in the form of garments, which can signal the user's presence. The enhanced visibility equipment is intended to provide more conspicuous visibility of the wearer in medium risk situations under any daylight conditions and/or under illumination by vehicles headlights or searchlights in the dark.

2. RECYCLED POLYESTER

All polyester fabric we use in PROGRESSION collection is recycled from PET bottles. Recycled polyester significantly reduces the carbon footprint and energy consumption compared to virgin polyester. It also diverts plastic waste from landfills and oceans. rPET maintains the same properties as virgin polyester, such as durability, flexibility, and resistance to wrinkles and shrinkage.

3. ORGANIC COTTON

All cotton fabric we use in PROGRESSION collection is organic. Organic cotton is grown without the use of synthetic pesticides, herbicides, or genetically modified organisms (GMOs). The farming practices used to produce organic cotton aim to promote soil health, reduce environmental impact, and support biodiversity.

Organic cotton farming typically uses less water and energy compared to conventional cotton farming. It also avoids harmful chemicals, reducing pollution in soil and water and benefiting local ecosystems.

7. EN 14404

EN 14404 is the European standard which specifies the properties of the knee pads used when working in a kneeling position. The standard is designed to ensure that the knee pads give sufficient protection and comfort for the wearer. Knee pads that comply to EN 14404 is subjected to a number of tests to assess the impact resistance, ergonomic design and level of comfort.

To be certified for EN 14404, the knee pads have to be combined with a pair of trousers that jointly applies to the same certification. PROJOb's knee pads are certified to EN 14404, type 2, class 1.

8. EN 343

Products certified according to EN 343 includes technical and functional fabric for protective clothing.

EN 343 is the European Standard for garments that protects the bearer against wet weather. This standard involves testing of seams for water penetration in classes 1-4 and resistance to water vapor in classes 1-4, with 4 being the highest class. The garments must achieve results on both tests to be labeled with the EN 343 symbol.

9. EN 342

EN 342 is a European standard that specifies the requirements and test methods for protective clothing designed to provide protection against cold environments. This standard is particularly relevant for clothing intended for work in cold conditions where the air temperature can go below -5°C. Clothing is tested under various conditions to determine its thermal insulation, which can be categorized into two types:

- Represents the thermal insulation of the entire clothing ensemble.
- Represents the thermal insulation of the ensemble without taking into account the effects of air and movement.

This standard is vital for workers in industries such as construction, agriculture, and logistics, where protection against cold is critical for safety and productivity.

12

MAJOR PROGRESSION BENEFITS

4. LIFECYCLE ANALYSIS

Life-cycle assessment (LCA) is a process of evaluating the effects that a product has on the environment over the entire period of its life thereby increasing resource-use efficiency and decreasing liabilities. It can be used to study the environmental impact of either a product or the function the product is designed to perform.

LCA is commonly referred to as a "cradle-to-grave" analysis. LCA's key elements are: (1) identify and quantify the environmental loads involved; e.g. the energy and raw materials consumed, the emissions and wastes generated; (2) evaluate the potential environmental impacts of these loads; and (3) assess the options available for reducing these environmental impacts.

5. ISO 15797

Specifies test procedures and equipment which can be used in the evaluation of workwear intended to be industrially laundered. They serve as a basis for testing relevant properties such as dimensional stability, color characteristics, creasing, seam puckering, pilling and visual aspects in general.

6. DECOMPOSTABLE PACKING

All garments in the PROGRESSION series are delivered in packing made of PLA material, a biodegradable polymer produced from renewable plant resources. By choosing PLA materials, we reduce the amount of plastic waste and the problems associated with the long degradation time of traditional plastics normally used in polybags.

10. RECYCLED THREAD

Coats EcoVerde is the first globally available 100% recycled line of premium corespun and textured sewing threads, delivering the same proven level of performance as the industry's leading non-recycled threads.

EcoVerde threads help complete the loop for garments and accessories that already use recycled polyester fabrics or other eco-friendly fabrics or materials.

Waste plastic is collected from various industrial and post-consumer sources. Used plastic (PET) bottles are a significant proportion and an example of how this works. These are collected, sorted, cleaned, ground to flakes and then melted down and extruded into the fibre and filaments from which EcoVerde sewing threads are made.

11. YKK RECYCLED ZIPPER

We use zippers from YKK NATULON®. The NATULON® product line is designated for customers who want to increase the amount of recycled material in their products.

The NATULON® Mechanically Recycled zipper is made from materials recycled from plastic bottles and other materials using mechanical recycling technology. The yarn used in the tape is made from over 99% post-consumer recycled materials.

12. OEKO-TEX STANDARD 100

Oeko-tex standard 100 is one of the world's best-known labels for textiles tested for harmful substances. The standard stands for customer confidence and high product safety.

EN 17353 INCREASED VISIBILITY

Certification for increased visibility for medium risk situations.

This certification specifies requirements for increased visibility in the form of clothing, which signals the user's presence. The enhanced visibility equipment is intended to provide a clearer visibility of the wearer in medium risk situations under all daylight conditions and/or under the illumination of vehicle headlights or searchlights in the dark.

THREE CATEGORIES OF VISIBILITY

Type A > For protection in daylight, minimal amount of fluorescent material.

Type B > For protection in the evening and at night. Garments certified according to EN 17353 type B must either have loosely hanging reflectors (B1), have removable reflectors and/or fixed reflective material on legs or arms (B2), or meet the minimum requirement for reflective material with reflective bands across both chest and legs/arms (B3).

Type AB > Protection in daylight, dusk and at night. Garments certified according to EN 17353 type AB must have both fluorescent and reflective materials, or materials that have both properties. AB2 around arms and legs. AB3 around torso or around torso and arms/legs.

The garment must be completely closed and must not be covered to ensure visibility. Visibility is also dependent on use (soiling, etc.), care (cleaning, repairs, etc.) and storage. The lifespan of the garment depends on use, maintenance and care.

Type A Daylight	Type B For protection in evening and in dark conditions	Type AB For protection in daylight, in the evening and in dark conditions
Minimal amount of fluorescent material	Equipment that has retroreflective material	Equipment that has fluorescent and retro-reflective materials, or combined performance materials
	B1 - loosely hanging	
	B2 - removable reflectors and/or fixed reflective material on legs or arms	AB2
	B3 - around torso and legs/arms	AB3

	Fluorescent material (m ²)	Retroreflective material (m ²)	Combined material (m ²)
Type A	≥ 0.24	-	-
Type B1	-	≥ 0.003	-
Type B2	-	≥ 0.018	-

PRIO SERIES

**CONSTRUCTION • PANTS & SHORTS • COVERALLS
JACKETS & VESTS • SWEATERS • T-SHIRTS & PIQUES**

The PRIO series has been quite successful in the years since 2017 when we presented it. It was radical to us to take our concept under scrutiny and ask ourselves "How can we create a collection with a significantly lower price without compromising our core values, Ergonomics, Quality and Function?"

We did a good job. We found alternative suppliers of high quality, we discarded

"nice-to-have" details and we focused on volumes of the top-selling items on a European scale. The PRIO garments has over time done well without inflicting on our other range. It simply attracts another market segment.

PRIO is still a category in its own right in our market offer. One that we are proud of and strongly recommend.

HIGH VISIBILITY EN ISO 20471

Guide EN ISO 20471

Reflective clothing is personal protective equipment. Personal protective equipment are products that are designed to be used by a person for protection against health and safety risks.

The special demands placed on personal protective equipment in Europe are described in EN-norms. Products that pass these basic safety requirements are allowed to carry the obligatory CE-mark. In order for a safety product to be approved and marked with the CE mark, it must have been tested and certified by an authorized organisation.

HIGH-VIS CLOTHES FOR PRO USERS

These have to be CE-marked and approved according to the norm EN ISO 20471 (earlier EN 471). The norm describes among other things what colours are permitted, where on the clothes the reflecting material is to be placed, and which information that must accompany the clothes. The design of the clothes must also follow certain criteria in order to achieve the best possible visibility. In the norm there are three classes. The norm specifies how much fluorescing cloth and how big the reflective area reflective clothes of each class must have.

Minimum area with high visible material, m²

	Class 1	Class 2	Class 3
Background material	0,14	0,50	0,80
Reflective material	0,10	0,13	0,20

Class 1

This gives the lowest level of protection. The total fluorescent area must be at least 0.14m² and the reflective area 0.10m². May only be used if there is little contact with a few vehicles and/or slow moving traffic.

Class 2

Gives a much better protection than class 1, especially in daytime, twilight and fog. The total fluorescent area must be at least 0.50m² and the reflective area 0.13m². Class 2 is used in harbours, on railways, building sites, parking places, cross country searches, load bearing vehicles and other places where class 3 is not required.

Class 3

This gives the highest level of protection. The total fluorescent area must be at least 0.80m² and the reflective area 0.20m². To be used in the proximity of fast moving traffic.

WOMEN'S WORKWEAR

**HIGH VISIBILITY • CONSTRUCTION
TRANSPORT, SERVICE & INSTALLATION • PROGRESSION**

The development of garments in Women's fit and sizing has been paramount to Projob for many years. This is a matter of principle rather than economy, since the demand is still small compared to Men's workwear. But then we are, in a global perspective, a small market actor with a big vision and a strong sense of equality for all.

What we offer in Men's/Unisex cut we increasingly offer in Women's size, if not in range depth then in range width. That is why we present whole work ca-

tegories under one umbrella: Women's Workwear. It gives you a good view of our offer.

6449

FUNCTIONAL JACKET WOMEN'S EN ISO 20471 CLASS 2/3

ORYX WORKSHOES

**LOW CUT • MID CUT
INSOLES**

The way towards the Oryx workshoe collection has been long and full of preparations, as we do not enter new fields of work attire lightly. We know that whatever we do, we must do it well and we must have a very long perspective.

Workshoes are a vital part of workwear but it is also a very different production process and a different know-how. This competence is now attached to us and integrated in our organization. Yet we are not aiming to take over the market, but to offer very good, durable and comfortable medium-priced to the rising number of companies who wish to have a limited number of suppliers in their

purchasing channels and have chosen us as the dedicated supplier of workwear in general.

This year we take the first steps in that direction and it feels good.

INSPIRED BY THE ORYX.

The Oryx is a legendary antelope of the deserts of the Arabian peninsula and throughout most of Africa. It lives in the harshest and most hostile of environments and moves over extremely large areas. Imagine how well designed their hoofs must be.

To name our new workshoe line after the Oryx is a subtle way to say "These durable shoes will take you far, regardless of the conditions".

Now you know the connection. Go on to learn more about the new shoes.

ACCESSORIES

**KNEEPADS • SOCKS • HATS & CAPS
BELTS & BRACES • MISCELLANEOUS**

"Save the best for last", the old proverb goes. Well, to aspire to be best, every workwear collection depend on the accessories that make it complete. The details that have been elaborately developed to fit a patented solution or simply just a plain beanie to keep you warm.

We are restrained in the development of accessories but when we do take up new items we mean business: We are especially proud of our underwear

and socks which we have produced in close cooperation with leading sportswear companies. They are supreme.

THE IMPORTANCE OF USING KNEE PADS

Prevent injuries: Knee pads help stabilize the knee and reduce the risk of injuries, such as ligament injuries, meniscus injuries and knee injuries.

Increase performance: Knee pads provide support and stability, which can help improve performance during physical activity.

Relieve pain: Knee pads can help reduce pain and inflammation in existing knee injuries.

Increase comfort: Knee pads can provide support and warmth, which can make it more convenient to be active.

When to use knee pads depends on individual needs and situations. Knee pads can be a good idea for people who are active and expose their knees to stress, for example construction workers or others who perform physically demanding work. Also for people who have an increased risk of knee injuries, for example people with obesity, arthritis or other knee injuries. Has existing knee injuries that need support and stability.

Knee pads should be comfortable to wear and provide the support and stability you need.

How do you choose the right knee pads?

Determine the type of knee protection you need. There are knee pads that provide support, stability, warmth or a combination of these. Measure your knees before buying knee pads. Knee pads should be tight fitting, but not so tight that they are uncomfortable.

Get the help of an expert if you are unsure about the type of knee protection you need.

9050 ERGONOMIC KNEEPAD

Ergonomic pre-bent knee protectors. The smooth outer shell ensures that the cover does not "pinch" the pants. The material used has been recommended by experts within the ergonomics and company health care areas.
Measurement: 15 mm

Size: ONE SIZE
Quality: GelFoam
Colors: blue-56

9056 ERGO KNEE PROTECTION

Ergonomic curved knee protector. Conform to the European Directive 89/686/CEE following the EN 14404+A1:2010 official tests.
Measurement: 1,7x25 cm (curved)

Size: ONE SIZE
Quality: PE
Colors: blue-56

9033 ERGO KNEE PROTECTOR 11 MM

Ergonomic knee protector for when you want to look out for your knees. Recommended by many experts in ergonomics and occupational health.

HAMMER LOOP

Soft hammer loop that fits on all pants that have velcro fasteners at the top, the construction works on both left and right sides. Soft and flexible and does not need to be removed when washing.

Size: ONE SIZE
Colors: black-99

9004 LEATHER BELT

Swedish made belt in thick naturally tanned leather with metal buckle at front.
Measurement S: 105x4 cm
Measurement L: 120x4 cm

Size: S:105 cm, L:120 cm
Quality: 100% leather
Colors: black-99

9070 BELT

Stretch belt with plastic buckle.
Measurement: 125x3,7 cm.

Size: ONE SIZE
Quality: 77% polypropylene, 23% elastane
Colors: black-99

9001 STRETCH BELT

Elastic belt that follows the movements of the body. Buckle with bottle opener at the backside.
Measurement: 125x3,7 cm

Size: ONE SIZE
Quality: 70% polypropylene, 30% elastane
Buckle: 100% nickel free metal
Colors: black-99

9031 BELT STRECH

Elastic belt that follows the movements of the body. Buckle with bottle opener on the backside.
Measurement: 125x3,7 cm

Size: ONE SIZE
Quality: 70% polypropylene, 30% elastane
Buckle: 100% nickel free metal
Colors: black-99

9060 BELT

Belt with plastic buckle. Metal-free.
Measurement: 125x3,7 cm.

Size: ONE SIZE
Quality: 100% polyester
Colors: red-35, sky blue-53, navy-58, forest green-66, grey-98, black-99

9020 BELT

Belt with metal buckle. Bottle opener on the backside of the buckle.
Measurement: 125x3,7 cm

Size: ONE SIZE
Quality: 100% polyester
Colors: black-99

9036 VELCRO BELT

Leather bucklebelt, ideal for the car industry and coating plants. Adjustable with Velcro.
XS-S: 117x4 cm
M-XL: 130x4 cm
XXL-3XL: 147x4 cm

Size: XS-S: 117cm, M-XL: 130cm, XXL-3XL: 147cm
Quality: 100% polyester
Colors: black-99

9039

ZIPPULLER 10-PACK

Zip pullers packed 10 pcs. One color per bag.

Size: ONE SIZE
Quality: 100% polyester
Colors: white-00, yellow-10, red-35, grey-98, black-99

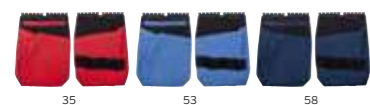

9042

HOLSTER POCKETS

Holster pockets that are suitable to PROJOB pants provided with track rails. Pockets are reinforced with Cordura® for increased durability. One pocket with extra pockets, both open and one with zip closure. The other one with open pockets and loops for tools. Possible to adjust your pant after need, use both holster pockets or just one of them.

Size: ONE SIZE
Quality: 65% polyester, 35% cotton Reinforcement in 100% polyamide
Colors: red-35, sky blue-53, navy-58, black-99

9045

ID-CARD POCKET

Soft ID-card holder.

Size: ONE SIZE
Quality: 100% polyester, 100% PVC
Colors: black-99

9035

ID-CARD HOLDER

Soft ID-card holder.

Size: ONE SIZE
Quality: Cordura®
Colors: black-99

9032

ID-CARD HOLDER 5-PACK

ID-card holder to be attached with a carbine hook or brace clips. Sold in 5-pack.

Size: ONE SIZE
Quality: n/a
Colors: black-99

SUSTAINABILITY

We have the possibility to contribute and make a difference through our global operations. PROJOB is a part of New Wave Group. New Wave Group is working with social and environmental sustainability under the term CSR (Corporate Social Responsibility). As our customer, you are supporting this work.

New Wave Group has two main strategies to decrease our environmental impact and to cut our emission of greenhouse gases. First of all, we must influence the transportation companies that we are working with. Our membership in "Clean Shipping Index" aims to impact the shipping companies to use cleaner vessels by ranking the most high-performing ships. The Group works with some of the largest transportation companies on the market, all of which have environmental programs in place for their operations.

Secondly, we always strive to improve our internal logistics and work methods. Within our group of companies, we club together as much as possible of our shipments and transportations. In addition to protecting the environment, sustainable solutions can also contribute to the streamlining of our operations.

WE LIKE SUSTAINABLE PRODUCTS

New Wave Group believes in classic design and good quality products - a concept that will never be out-of-fashion. We hope you will enjoy our products for a long time. All products can be customized to your precise demand, which is a good way to ensure long-lasting use and sustainable consumption.

It is important to New Wave Group that our products are safe and free from restricted chemicals. New Wave Group is a member of the Swedish Chemicals Group at Swerea IVF to receive the most updated information on legislation and developments. This supports our active work to reduce and replace chemicals in line with best available technique. All our suppliers must follow the requirements in our Restricted Substance List. The list has been designed in accordance with legislations such as REACH, but also taking into account industry recommendations and standards. As a result, our requirements are often stricter than the applicable legislation.

Learn more about our Code of Conduct and our sustainability work on New Wave Group's webpage: www.nwg.se/en.

IMPROVING WORKING CONDITIONS

New Wave Group is never far away from the manufacturing of our products. Being represented on site enables us to have a close partnership with our suppliers and to actively monitor their business operations. We have a CSR-team, which consists of full-time staff dedicated to visit our suppliers, monitor and support them with various social and environmental topics.

As a member of BSCI, New Wave Group has adopted the BSCI Code of Conduct. It contains requirements on minimum wage, working hours and the prohibition of child labour, among several other requirements from international conventions like to ILO Conventions and the Declaration of Human Rights. New Wave Group has a commitment towards BSCI to engage our suppliers in third party examination by independent auditors. Having both internal and external audits is a quality assurance to us. We strive for constant improvements and continuous development.

New Wave Group is a signatory member of the pioneering Accord on Fire and Building Safety in Bangladesh. The Accord is a binding contract between brands, international and local trade unions and NGOs. Its aim is to make all garment factories in Bangladesh safe workplaces, which includes a program of safety inspections and a commitment to ensure that the necessary repairs and renovations are carried out. The Accord will have significant impact on the daily lives of millions of textile workers in Bangladesh. We are proud to be a part of this project!

GUIDE MATERIALS

VENT AIR® is wind and waterproof with breathability. VENT AIR® keeps the body dry and cool while protecting against the forces of weather. The material consists of three-component high-tech weave, a functional material with a coating on the inside and a water-repellent treatment on the outside.

Cordura® is DuPont's brand of extremely durable polyamide material. It is three times as strong as standard polyamide, up to seven times as strong as cotton and yet is fine and supple. We use it primarily as reinforcement in places that are exposed to hard wear.

YKK is a market-leading brand in zippers. The products are of high quality and set the standard for other players in the market.

3M Scotchlite™ person reflex material makes you extra visible when it's dark and the view is bad. The material reflects bright white when it's lit up by the headlights of a vehicle, also when the wearer stands beside the road. 3M Scotchlite reflex material for protective garments exceeds the highest reflex category of the European standards for reflective protective garments EN ISO 20471, as well as all strict, standardised tests.

Coats Epic has set a new standard in the thread market. It consists of a core of polyester fibre around which is spun yet another polyester fibre. The combination makes for a thread with maximal tensile strength, which results in seams with extreme durability.

Duraflex is the trade mark of the high-quality buckles used in PROJOB clothes, belts and carrying systems.

PrimaLoft® is a brand of patented synthetic microfiber thermal insulation material, originally developed for military use.

CRAFT® is a world leading producer of functional sports apparel and innovative supplier of three-layer-principle garments. Craft provides the fabrics and know-how to our workclimate underwear.

Materials with 37.5°-technology help to keep your body at the ideal temperature 37,5°C. The material contains naturally active particles, permanently embedded in the fiber which, when you get hot, removes sweat in the vapor stage before liquid sweat forms. 37.5° is a trademark of Cocona, Inc.

COTTON

Cotton is a soft and comfortable natural material. It insulates and ventilates. One of cotton's advantages is that it does not melt when exposed to flames and sparks and that it is difficult to set fire to. Our heavy-duty cotton twill is extra sturdy and durable. This is possible because we ourselves are involved in and direct development from fibre to final production.

POLYESTER/COTTON

The combination of cotton and polyester have proven perfect for making long-lasting garments. The breathability of cotton combined with the durability and colourfastness of polyester make garments in polyester/cotton keep their shape and colour longer. Clothes in polyester/cotton are therefore an excellent choice for hard work that places great demands on both the wearer and the garments.

SPUN DYED

Using the traditional dyeing method, the finished fabric is dipped in a dye bath, before being rinsed and then dried. With the spun dyed process, the colour pigment is added before the fibre is spun and the fabric subsequently woven/knitted.

In this way the colour becomes part of the fibre. The woven/knitted fabric achieves much better colour fastness, making it better able to withstand washing, wearing, sunlight and bleaching.

In environmental terms, spun dye is much more eco-friendly than the traditional method of dyeing. As it eliminates a stage

ProDry™ are the materials you wear closest to your skin. They transport moisture and allow it to pass to the outer layer. With ProDry™ there you don't have to have damp and cold garments next to your body.

PRO DRY™

Pro Thermal™ are the materials that afford effective insulation against both heat and cold. The materials detect and dispose of surplus heat at the same time that they keep out unneeded cold. Pro Thermal™ keeps body temperature at an even and pleasant level all day.

PRO THERMAL™

Pro Vent™ are the materials with high breathability. They let out moisture and superfluous heat. They withstand rain, snow and wind. Pro Vent™ are resilient, protective materials worn on the very outside.

PRO VENT™

Pro Tec™ are the materials that afford effective protection against exterior effects. They are very resistant to wear and to tearing. Pro Tec™ is suited to extremely strenuous work in rough environments.

PRO TEC™

WASHING INSTRUCTIONS

WASHING

All our garments are properly tested. Each of them has its own washing instructions, and it's important to follow these. If a garment is always washed with similar colours and at the recommended temperature, it will stay good looking for longer.

If the label says Wash separately in the washing instructions, this means that the colour of the fabric may run – for these garments, which may initially have a little extra dye, it is particularly important to follow the washing instructions to not harm any other garments.

PREWASH

Use the same amount of detergent as in the main wash cycle when prewashing very dirty clothes, skip the prewash cycle completely for less dirty garments to save water and energy. Soaking garments is not recommended due to the damage which undissolved detergent can do to fabrics.

DETERGENT

Always be sure to use the correct amount of detergent – use the detergent packaging as reference. Choose a bleach-free detergent which is suitable for the temperature of the wash.

DRYING

Only tumble dry as a last resort – if you have enough time and space, hanging garments out to dry is recommended as this is better for your clothes. Smooth out the fabric and the seams before hanging up a garment. When tumble drying, the garment should never be completely dried, as this causes unnecessary wear and can cause shrinkage.

CHOOSE SIZE CAREFULLY

Size is extremely important when it comes to work clothes – it affects function, wear and ergonomics. PROJOb clothing is designed with flexibility in mind. Clothes that are the wrong size prevent the wearer from moving around freely. Pockets and other functional details which are used repeatedly during the working day need to be positioned where they can be reached easily. If the clothing is the wrong size, either the positioning of the pockets will force the wearer to make strenuous movements, or the pockets will serve no purpose at all. It's also extremely important for the knee protectors to be in the right place to prevent unnecessary wear. The size also affects how long clothes last – the tighter the garment, the greater the strain on the seams and the fabric.

The PROJOb collection includes sizes to meet every need. Almost all our tops are available in XS–4XL and almost all our trousers are available in C44–C62, D84–D120 and C146–C156.
